to the firebox floor? _____ inches

Gas Type Used in Fireplace (check)

Natural L.P.

SPECIAL SIZING REQUIREMENTS

If using a Safety Pilot Kit, please allow an additional 3" on each side of the log set for a total of 6" additional space.

If using a Remote Control System, please allow an additional 6" on each side of the log set for a total of 12" additional space.

This additional space may be required to center your gas log set in the fireplace.

For specifics, check with Okaloosa Gas. This document also available at
